DG834GT
108 Mbps Super Wireless ADSL Router
with 4-port 10/100 Mbps switch

• Help is there when you need it! NETGEAR provides 24x7 technical support* in English, with selected local language support during office hours.

Wireless or Wired Instant Broadband Access with Internet Sharing

This 802.11g and Super G™ wireless router adds considerable power and flexibility to your network. Five products in one, it combines an ADSL modem, router, 10/100 LAN switch, 108 Mbps Super G access point and SPI Double Firewall. It gives you untethered continuous connectivity to your network resources and the Internet and allows you to share your broadband access with all of your networked computers wirelessly or with wires using Ethernet cables. Featuring high-speed 802.11g and Super G wireless capability – up to ten times faster than 802.11b – it allows you to download large files, videoconference, and distribute and play high-quality digital movies, byte-hungry photos, and smooth, MP3s and digital movie streams at long range in the blink of an eye. Simple to use, it plugs directly into your ADSL line. An integrated switch lets you directly connect four computers or any combination of four computers, access points or printers. Setup couldn't be easier – NETGEAR's Smart Wizard install assistant and on-screen help guide you through each step. The Smart Wizard automatically detects and makes the best connection to your ISP while a graphical user interface is available in English, French, German and Italian. A true Firewall protects your network with business-class security against intruders, including logs and alerts of break-in attempts, while VPN pass-through makes it safe to connect to your business network from home or office. The contemporary, sleek design of this unit suits your home or office. Future upgrades to firmware can be obtained via the Internet.

Faster Than Ever

The DG834GT gives you instant connectivity with or without wires, and works with your existing 802.11b devices as well as your new 54 Mbps 802.11g and Super G devices. A built-in ADSL modem furnishes direct, always-on Internet connectivity and multi-user access sharing at speeds up to 140 times faster than dial-up. This powerful router distributes MP3s, digital movies and photos with ultra-fast 10/100 switched LAN ports capable of speeds of 200 Mbps, and shares a single IP address with up to 253 users.

Hassle Free

No need for a separate modem – this unit connects directly into your ADSL line. Built-in Port Forwarding settings, Universal Plug and Play (UPnP™) and Virtual Private Network (VPN) pass-through make it simple to play Internet games, send instant messages, and host Internet services. The user interface matches your local language (English, French, German or Italian). The DG834GT supports PCs, Macintosh®, and virtually all Ethernet devices, and comes with a free Ethernet cable for connecting your first computer.

Secure

True Firewall using Stateful Packet Inspection (SPI) and Intrusion Control features Denial of Service protection from hacker attacks, while VPN (Virtual Private Network) pass-through permits secure access to your office or corporate network and enables you to host VPN services. Content filtering lets you control access to inappropriate web sites and limit usage by time of day. Logs browsing activities and provides optional e-mail alerts so you can monitor access. DMZ support allows unrestricted access from the Internet to one computer (for hosting web services).
